SUMMARY

I sell business software for a living. I manage the entire sales cycle: first call, demo, onboarding, and staying with the customer until the software is actually working for them. I have learned to listen first and show less of the product, not more. Currently working through the ERPNext certification on Frappe School, and aiming for a Product Consultant role in the Frappe and ERPNext ecosystem.

EXPERIENCE

Business Development Executive
The BAAP Company

Sep 2025 – Present
Remote

- Sell and demo business software to growing companies: CRM, ERP and HRMS.
- Run the full cycle from first call to demo to onboarding, staying with the customer until the software is working for them.
- Feed customer requirements and gaps from demos back to the product team.

Business Development Executive
Britsure InsureTech Pvt. Ltd.

Apr 2024 – Sep 2025
Pune, Maharashtra

- Ran pre-sales for two products: InvestiGo, a claims investigation management platform sold to investigation agencies and TPAs, and IRMS, a risk management platform sold to insurance companies.
- Delivered 50+ product demos, mapping how each customer actually handled claim intake, investigator assignment and closure before showing the product against that workflow.
- First sales hire at the company. Built the sales process from scratch: qualification criteria, outreach cadences and CRM pipeline stages.

MERN Stack Developer
SDLC Corp

Mar 2023 – Feb 2024
Aurangabad, Maharashtra

- Built and maintained full-stack web applications across MongoDB, Express.js, React and Node.js.
- Built responsive front-end interfaces in React and tested features across the stack before release.
